

faciliCAD LLC announces an upgrade path to all current FM Desktop Users!

A competitive discount on software will be offered to anyone looking to migrate from FM desktop to the faciliCAD product line.

Product Description:

faciliCAD IS Facility Management Made Easy!

faciliCAD facility management software targets both small and large facilities looking for and inexpensive and user friendly CAFM (Computer Aided Facility Management) application.

faciliCAD connects AutoCAD drawings with a Microsoft SQL database, harnessing the power of AutoCAD with Facility Management specific features. By easily linking graphical objects to database records, faciliCAD transforms typical CAD drawings into intelligent resources, extending their value beyond the design phase throughout the life of the building.

faciliCAD is the perfect FM solution for Building Owners, Property Managers, Physical Plant Engineers, Architects, FM Consultants and others who need to accurately account for people, space and assets. Providing both graphical and non-graphical reports, faciliCAD brings clarity to any organization's facility management requirements.

Building Lifecycle Information can be accessed and edited through the faciliCAD Data Manager or the CAD Manager and viewed, queried and reported on using the faciliCAD Web Manager.

faciliCAD's core development is based on industry standard formats using an ODBC compliant Microsoft SQL database, Crystal Reports, AutoCAD dwg products and Autodesk Mapguide Open Source code.

Company Description:

The Partners of faciliCAD LLC have been involved in the Facility Management industry since 1987. faciliCAD LLC has been a member of the Autodesk developer Network since September of 2001, when faciliCAD LLC was established and Version 1 of faciliCAD was released. Since faciliCAD's first exposure to the general public, any and all new features and enhancements are direct results of end user feedback.

Mission Statement:

"To provide an FM solution that is both inexpensive and easy to use, based on the customer's needs and requests instead of what we think the customer needs".
