

# Chapter

# 1

## Table of Contents

|  |           |
|--|-----------|
| <b>General introduction to the book .....</b>            | <b>6</b>  |
| Additional comments and notes.....                       | 7         |
| Glossary .....   | 8         |
| AutoCAD Plant 3D Commands.....                           | 14        |
| AutoCAD Plant 3D System variables.....                   | 22        |
| <b>Project and drawing properties .....</b>              | <b>25</b> |
| Creating a new project .....                             | 26        |
| User Interface of the project properties dialog box..... | 33        |
| Project Structure.....                                   | 35        |
| How things work together.....                            | 37        |
| Adding Project Properties.....                           | 39        |
| Adding drawing properties .....                          | 41        |
| File naming scheme .....                                 | 43        |
| Selection Lists .....                                    | 45        |
| Exercise - 1.....  | 49        |
| <b>Layer and Color settings.....</b>                     | <b>51</b> |
| The default Layer and Color schematic .....              | 52        |
| Schematic settings .....                                 | 54        |
| Creating a new Schematic .....                           | 55        |
| Switching between automation schemes .....               | 57        |
| Pipe supports and automation schemes .....               | 59        |
| Exercise - 2 .....                                       | 60        |
| <b>Joint settings - End Connections.....</b>             | <b>61</b> |
| Type of connections.....                                 | 62        |
| Connection Adverbs .....                                 | 63        |
| Simple Joints vs. Compound Joints.....                   | 64        |
| Creating a new simple joint .....                        | 70        |
| Creating a new compound joint .....                      | 72        |
| Exercise - 3 .....                                       | 75        |
| <b>AutoCAD P&amp;ID Object Mapping .....</b>             | <b>77</b> |
| What does mapping properties lead to.....                | 78        |
| Mapping properties from P&ID with the 3D model .....     | 79        |
| Mapping the properties.....                              | 81        |
| Plant 3D Class Mapping .....                             | 83        |

## Table of Content

---

|   |            |
|---|------------|
| <b>Setting the Tag format.....</b>                            | <b>85</b>  |
| Where do you create the Tag format.....                       | 86         |
| Equipment Tag .....   | 87         |
| Valve Tag .....   | 91         |
| Pipe Line Tag .....   | 96         |
| Exercise - 4 .....  | 99         |
| <b>Orthographic Annotations.....</b>                          | <b>101</b> |
| Annotations set-up.....                                       | 102        |
| Equipment Annotation.....                                     | 103        |
| Symbol Properties .....                                       | 106        |
| General Style Properties .....                                | 107        |
| Other Properties.....   | 107        |
| Pipe Line and Valve Annotation .....                          | 108        |
| Exercise - 5 .....  | 111        |
| <b>Setting up ISO styles.....</b>                             | <b>113</b> |
| Create a new Isometric style.....                             | 114        |
| The structure of an Iso Style .....                           | 115        |
| ISO Style Setup .....   | 118        |
| Iso Annotations .....   | 123        |
| Bill of Material.....   | 124        |
| Cut Pieces .....  | 125        |
| Welds.....  | 126        |
| Spools .....  | 127        |
| Valve Annotations .....                                       | 128        |
| End connection annotations .....                              | 129        |
| Connection Text .....   | 131        |
| Dimensions .....  | 134        |
| Sloped and Offset Piping .....                                | 146        |
| Sloped Piping .....   | 147        |
| Offset Piping .....   | 148        |
| Exercise - 6 .....  | 151        |
| Title block and display.....                                  | 153        |
| Setup Title Block .....                                       | 158        |
| Table Placement and Setup.....                                | 160        |
| Title Block Attributes.....                                   | 176        |
| Line Designation Table (LDT).....                             | 181        |
| Iso Themes .....  | 184        |
| Exercise - 7 .....  | 191        |
| Fine tuning your settings (Isoconfig.xml) .....               | 192        |
| Elevations at every change of direction and at branches ..... | 195        |
| Pipe Size annotation (modify) .....                           | 197        |
| Pipe Size annotation (Off) .....                              | 199        |
| Diminished Flow Arrow.....                                    | 200        |
| Line number annotation (Style) .....                          | 202        |
| Line number annotation (On/Off).....                          | 205        |
| Pipe Support Tag .....  | 206        |
| Dimensioning from/to Elbow ends .....                         | 208        |
| Fine tuning your settings (IsoSymbolStyles.dwg).....          | 210        |
| Creating your own Iso symbols .....                           | 218        |

---

|   |            |
|---|------------|
| <b>Catalog and Spec editor .....</b>                            | <b>225</b> |
| Default file locations.....                                     | 226        |
| Changing the default location .....                             | 227        |
| The Catalog and Spec Editor - creating a pipe spec.....         | 229        |
| Filtering for components .....                                  | 232        |
| Adding components to a spec .....                               | 234        |
| Setting the part priority .....                                 | 236        |
| Setting up the branch table .....                               | 238        |
| The Catalog Editor .....  | 243        |
| Adding Custom Properties.....                                   | 245        |
| Exporting and importing Catalog data.....                       | 247        |
| Port Properties.....  | 249        |
| The catalog editor Size tab .....                               | 251        |
| Size specific properties .....                                  | 254        |
| Creating new components.....                                    | 255        |
| Catalog Editor - Duplicate Component.....                       | 256        |
| Catalog Editor - Create new parametric component .....          | 258        |
| Catalog Editor - AutoCAD based components.....                  | 263        |
| PlantPartConvert .....  | 265        |
| Catalog Editor - AutoCAD based components (continued) .....     | 267        |
| Creating a new catalog .....                                    | 273        |
| Nozzle Catalog .....  | 275        |
| Bolt sets and bolt length.....                                  | 277        |
| <b>The report creator .....</b>                                 | <b>281</b> |
| Report Creator - Template location.....                         | 282        |
| Report Template settings .....                                  | 284        |
| Output Type.....  | 285        |
| Target.....   | 286        |
| Edit Query .....  | 288        |
| Edit Report Layout .....  | 291        |
| Creating a new report from scratch .....                        | 296        |
| Fine tuning the report .....                                    | 303        |
| Create new custom property.....                                 | 304        |
| Grouping of a property.....                                     | 307        |
| Adding Multiple groupings .....                                 | 309        |
| The sum of parts .....  | 311        |
| Report filter options .....                                     | 315        |
| Report Parameters .....   | 319        |
| Exercise - 8 .....  | 324        |
| <b>Tips &amp; Tricks (Advanced).....</b>                        | <b>325</b> |
| Pre-determined gasket type.....                                 | 326        |
| Adding simple joints .....                                      | 327        |
| Adding compound joints.....                                     | 329        |
| DefaultConnectorsConfig.xml.....                                | 331        |
| Link with the catalog and spec editor.....                      | 333        |
| Changing the catalog connected to a pipe spec.....              | 337        |
| Editing the pipe spec without the catalog and spec editor ..... | 337        |
