Revit LT™ 2014

Online trial for Autodesk Revit 2014 and Autodesk Revit LT 2014

This online trial for Autodesk® Revit® 2014 and Autodesk® Revit LT™ 2014 software is an instance of Revit and Revit LT hosted in the Autodesk cloud. The online trial, in combination with Autodesk 360, enables you to experience and evaluate Revit and Revit LT without large downloads or sophisticated computer hardware.

Note that the online trial is running on a remote server. Keyboard and mouse input are streamed to the remote server and graphics are streamed back to your machine. The online trials are compatible with Windows® XP SP3, Vista, 7, and 8 on both 32- and 64-bit.

Accessing Project Files

Project files accessed while using the Online Trial are saved and retrieved through Autodesk 360. After you launch the online trial version of Revit or Revit LT, use the Online tab to access the commands to download, upload, or upload and open files.

To use the Online Trial with existing Revit project files, you must first upload them. From the Online tab, click Upload Files and select one or more files to upload. Use CTRL and SHIFT to multi-select files. Click Upload. To download Revit project files, click Download Files. Select one or more files to download. Use CTRL and SHIFT to multi-select files. Click Open, select a destination folder for the files, and then click OK. Files remain in your Autodesk360 account after the trial expires. For more information on Autodesk 360, see the Autodesk 360 Help.

Known Limitations

1. You may experience slow performance when selecting a large project file to open from the cloud, or when upgrading or working with large projects.
2. *Revit trial only*: Worksharing is currently not supported in the online trial for Revit 2014. Attempting to use worksharing or opening projects where worksharing has been enabled in this environment could result in file corruption.
   a. Do not enable worksharing for projects created with the online trial for Revit 2014.
   b. If you have a workshared project that you would like to use for the online trial for Revit 2014, detach it from central and discard worksets before uploading to Autodesk 360.
