AutoCAD for Mac fails to launch when installed on migrated Mac hard drive

Like (0)  Share 

Mar 15, 2012

Issue:

You have used the Migration Assistant to migrate data from another hard drive (or you restored from a Time Machine backup) and the data being migrated/restored to your system drive includes a *FLEXnet Publisher* folder.

After migration, you successfully install AutoCAD for Mac but it fails to launch.

Solution:

When a FLEXnet-enabled product is installed on a Mac, a *FLEXnet Publisher* folder is created in */Library/Preferences*. This folder is where FLEXnet creates the trusted storage files for each FLEXnet-enabled product running on the system.

When this folder is migrated using the Apple Migration Assistant or restored using Time Machine, these utilities save
