Object Properties window has been dragged off screen and cannot be retrieved

Published date: 2002-09-25
ID: TS71278

Applies to:
AutoCAD® 2002
AutoCAD® 2000i
AutoCAD® 2000
AutoCAD LT® 2002
AutoCAD LT® 2000i
AutoCAD LT® 2000

Issue

The Object Properties window has been dragged off screen and you cannot retrieve it.

Solution

There are two methods of making the Object Properties window visible again.

Method #1

Edit the Windows® registry:

> **Warning!**
> Problems caused by improperly editing the Windows registry could render your computer operating system unusable. Microsoft provides a wealth of critical information that you need to know about the registry in the Microsoft Knowledge Base at http://support.microsoft.com/support.
>
> Use the Microsoft® Registry Editor only at your own risk and only after backing up the registry as well as the *system.dat* and *user.dat* files as outlined for your operating system in the Microsoft Knowledge Base and in the Technical Solution TS66513. Additional information about the registry is also available in the Help topics in the Microsoft Registry Editor

1. Start the Registry Editor and locate the following subkey:

   HKEY_LOCAL_MACHINE\SOFTWARE\Autodesk\AutoCAD\R15.0\ACAD-1:409\DockedTools

2. Edit the entry with the value name {6D32A2D9-832E-11D2-A83C-0060B0872C0B}. For a 1024 x 768 pixel screen resolution, use value data of **3 689 58 337 569 1** to set the Properties window to the docked position.
3. Exit the Registry Editor.

Method #2

1. On the Start menu (Windows), click Settings > Taskbar & Start Menu.
