Editing a Field		
<div>Save Cancel</div>		
Field name	<input type="text" value="Product Line"/>	The field name is the name you wish to be displayed on the workspace for this field.
Field ID	<input type="text" value="PRODUCT_LINE"/>	Automatically populated using Field Name. You can not edit the ID, and it must be unique to the workspace.
Field description	<div></div>	Enter the description you want to appear next to the field when users are creating or editing an item in the workspace.
Data Type	<div>Pick List ▾</div>	Select a format for the field, e.g., Date, Paragraph, Image etc.
Pick List Options	<div><div><div>[WS] tbl_Product Lines ▾</div><div>New Picklist Edit Picklist</div><div><div>Item Descriptor ▾</div><div><input type="checkbox"/> Display as link</div><div>Type: <input type="radio"/> Radio Button<ul style="list-style-type: none"><input checked="" type="radio"/> Single Selection<input type="radio"/> Show first value as default<input type="radio"/> Retains Last Saved Label<input type="radio"/> With search filter<input type="radio"/> Multiple Selection<input type="radio"/> Latest Version<input type="radio"/> Filtered</div></div></div></div> <div>Select the Pick List to use to populate the field (Workspace or User-Defined). You can also create a new Pick List or edit the selected one.</div> <div>Select the workspace field whose values you want available for selection in the Pick List field. If you select Item Descriptor (the default), you can display it as a link to the item selected in the Pick List.</div> <div>Select a behavior for the field. Some behaviors may not be available depending on your Pick List selections.</div>	
UOM	<div>None: <input checked="" type="radio"/></div> <div>Other: <input type="text"/></div>	Type or select a uom. If a uom is selected then a conversion from metric to imperial or vice versa is displayed next to the field value. If a custom uom is typed in then that uom will be displayed next to the field.
Display width	<input type="text" value="75"/>	The maximum number of characters that will be displayed at one time.
Visibility	<div>Always ▾</div>	Determines when users will be able to view this field. Always means it will be displayed while creating, editing or viewing an

Field visible in Preview Yes/NO?
