

# EXERCISE

Figure 2-92 Completed exercise

## SKILL EXERCISE 2-2

- In this exercise, you create a sketch with linear and arc shapes, and then add geometric and dimensional constraints to fully constrain the sketch. Start a new part file based on the *Standard(mm).ipt* and create the fully constrained sketch as shown in the following image. Create the two outer circles first, create the two lines, trim the two circles and place a vertical constraint between the line endpoints on both ends.
