

# Navisworks 2013 new features

# Navisworks Gauss

# Agenda

- Navisworks Gauss Features
- APIs
  - The Rice (must do)
  - The Wine (value add)

# Today's Agenda

- Navisworks Gauss Features
- APIs
  - The Rice (must do)
  - The Wine (value add)
- Timing

# Areas of Product Enhancement

- 4D / Scheduling
- 5D / Cost
- Location / Orientation
- Coordination
- User Experience
- Interoperability

# 4D / Scheduling

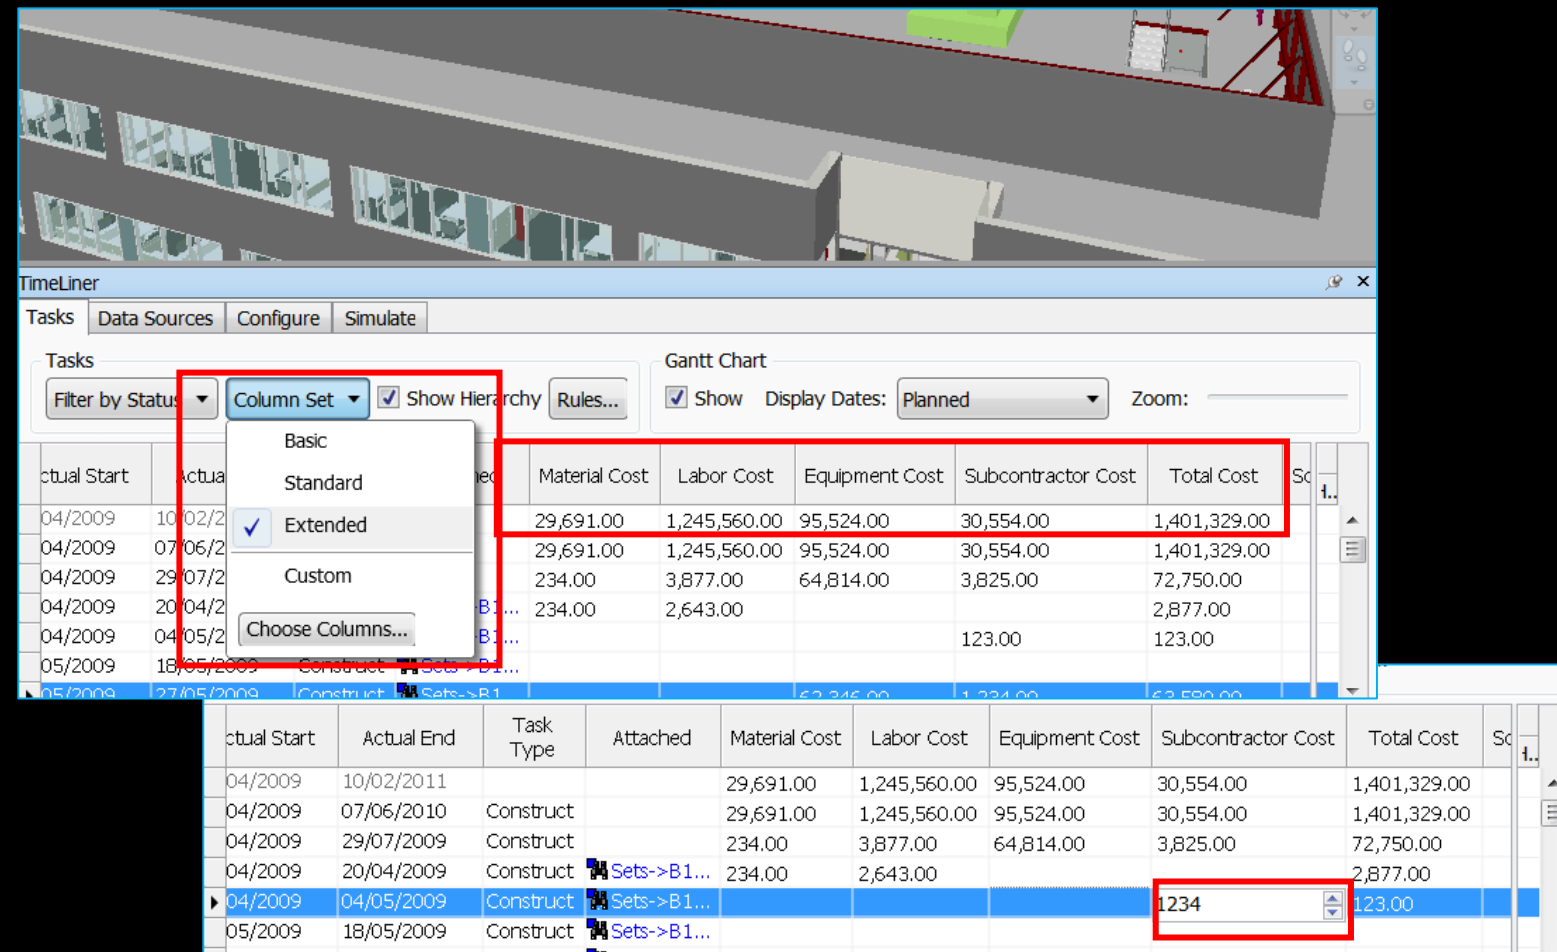

- **Edit Parent / Child Relationships**
  - Fully editable task hierarchy
- **Improved Task / Geometry Linkage**
  - Drag and drop objects and tasks
- **Export WBS to Scheduling Application**
  - Export to Primavera, Asta, MS Project via ProjectXML
- **Updated Data Source Support**
  - Microsoft 2010
  - Asta 11
- **Improved User Interface**

# 5D / Cost

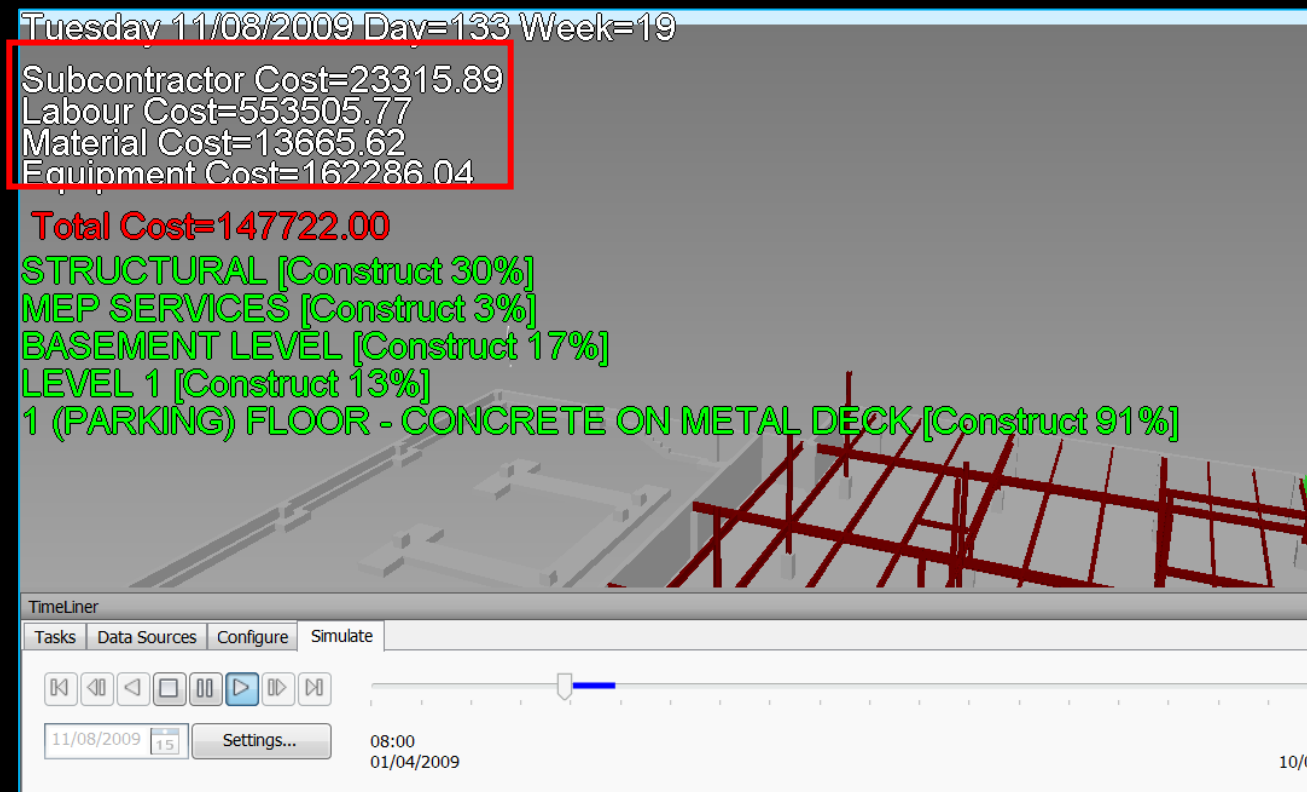

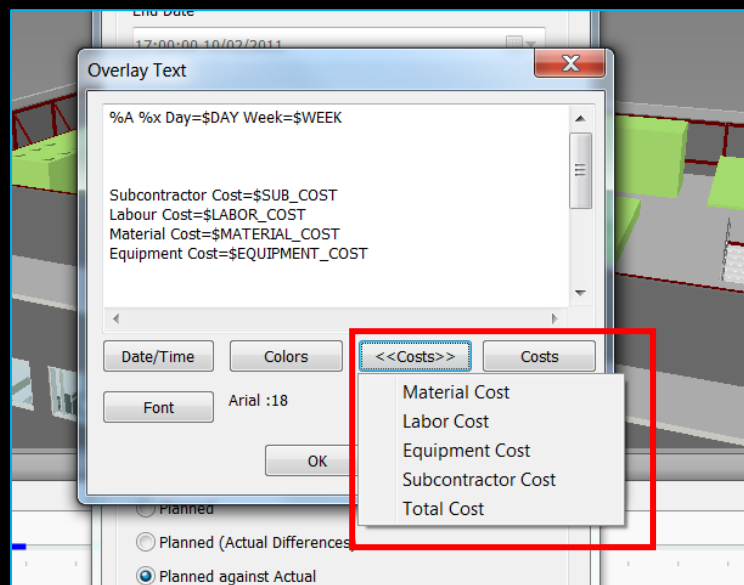

## ■ 5D Simulation

- Add or link costs to tasks: 'cost-loaded schedule'
- Accumulated cost reporting

The screenshot shows the TimeLiner software interface. At the top, there's a 3D model of a building. Below it, the 'TimeLiner' window is open, showing a table of cost data. The table has columns for 'Actual Start', 'Actual End', 'Task Type', 'Attached', 'Material Cost', 'Labor Cost', 'Equipment Cost', 'Subcontractor Cost', and 'Total Cost'. A red box highlights the 'Column Set' dropdown menu, which is set to 'Extended'. Another red box highlights the 'Total Cost' column in the table. A third red box highlights the 'Subcontractor Cost' column in the table.

Actual Start	Actual End	Task Type	Attached	Material Cost	Labor Cost	Equipment Cost	Subcontractor Cost	Total Cost
04/2009	10/02/2011			29,691.00	1,245,560.00	95,524.00	30,554.00	1,401,329.00
04/2009	07/06/2010			29,691.00	1,245,560.00	95,524.00	30,554.00	1,401,329.00
04/2009	29/07/2009	Construct		234.00	3,877.00	64,814.00	3,825.00	72,750.00
04/2009	20/04/2009	Construct	Sets->B1...	234.00	2,643.00			2,877.00
04/2009	04/05/2009	Construct	Sets->B1...				123.00	123.00
05/2009	18/05/2009	Construct	Sets->B1...					

# Location / Orientation

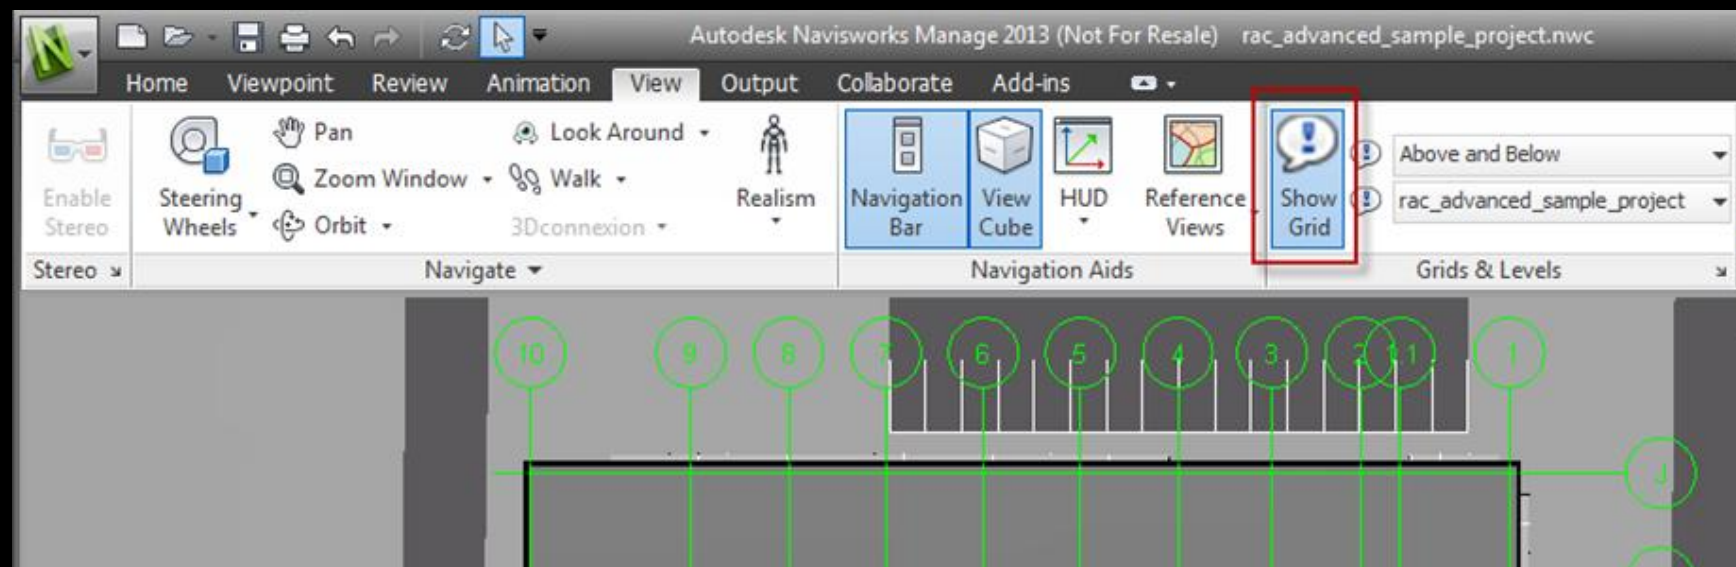

- **Gridline Representation**

- Import grids from Revit
- Utilize grids when viewing / analyzing / reporting

- **Level Representation**

- Import levels from Revit

- **Grid / Level-based Positional Readout**

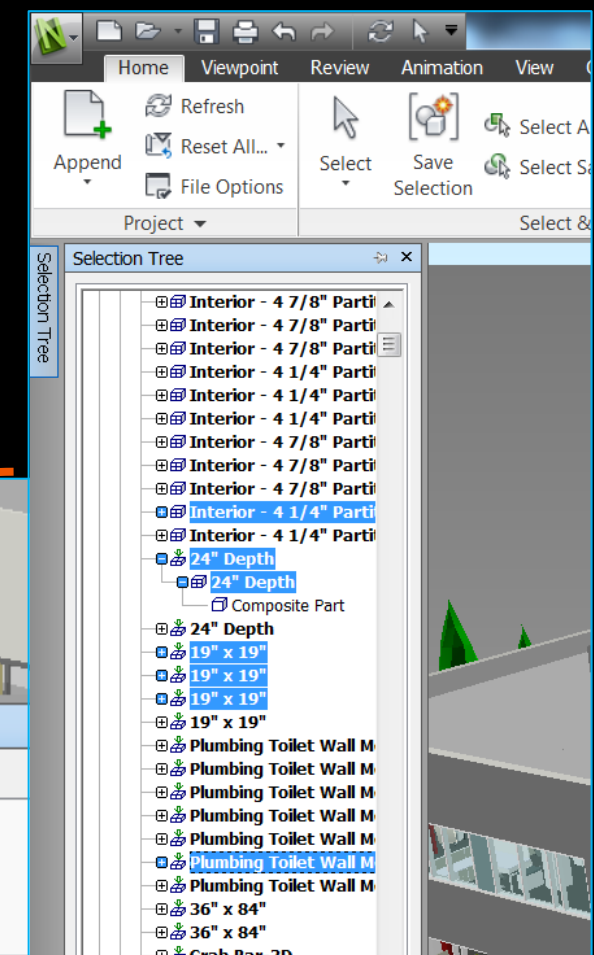

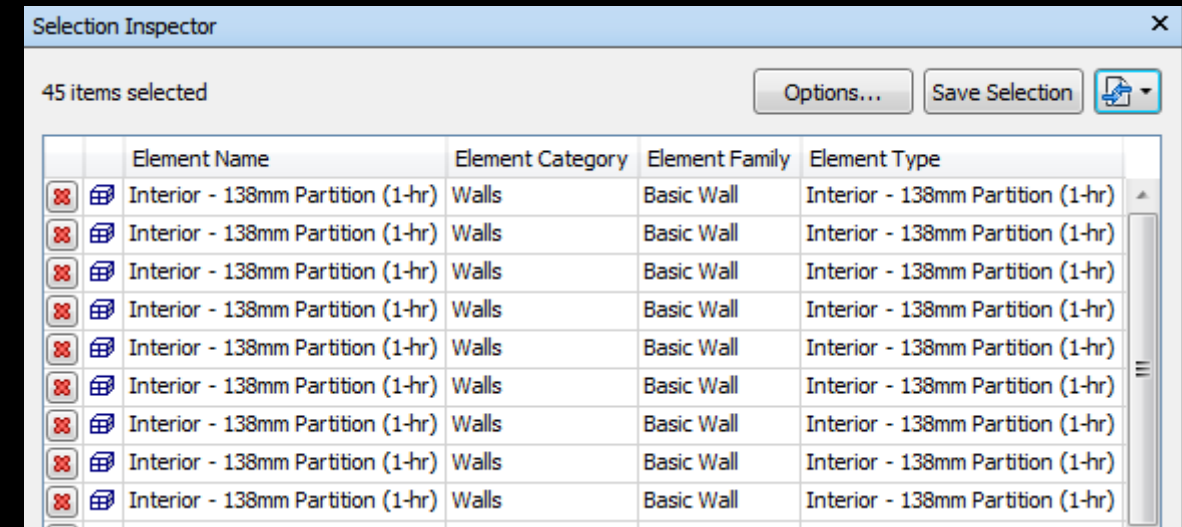

# Coordination

- **Clash support for grids and levels**
  - Clash results located by grid reference
- **Clash API**
- **Improved Clash Detective interface**

# User Experience

- Improved Sets Window
- Provide Selection Inspector
- Improved Import / Export Workflow
- Drag and Drop

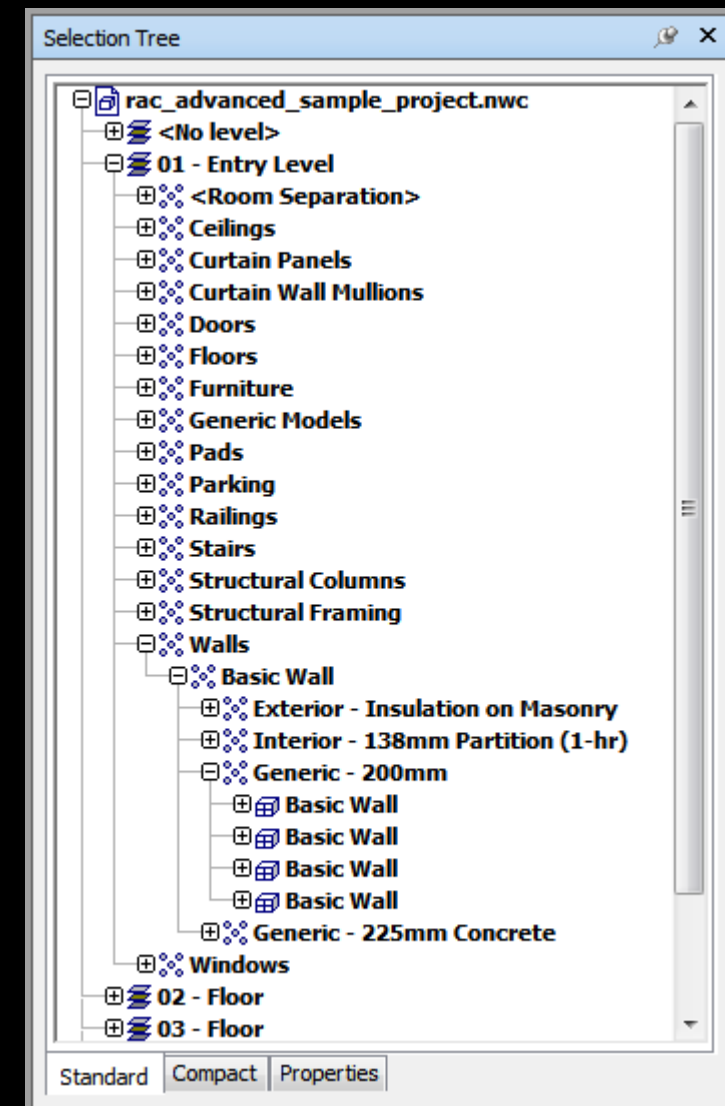

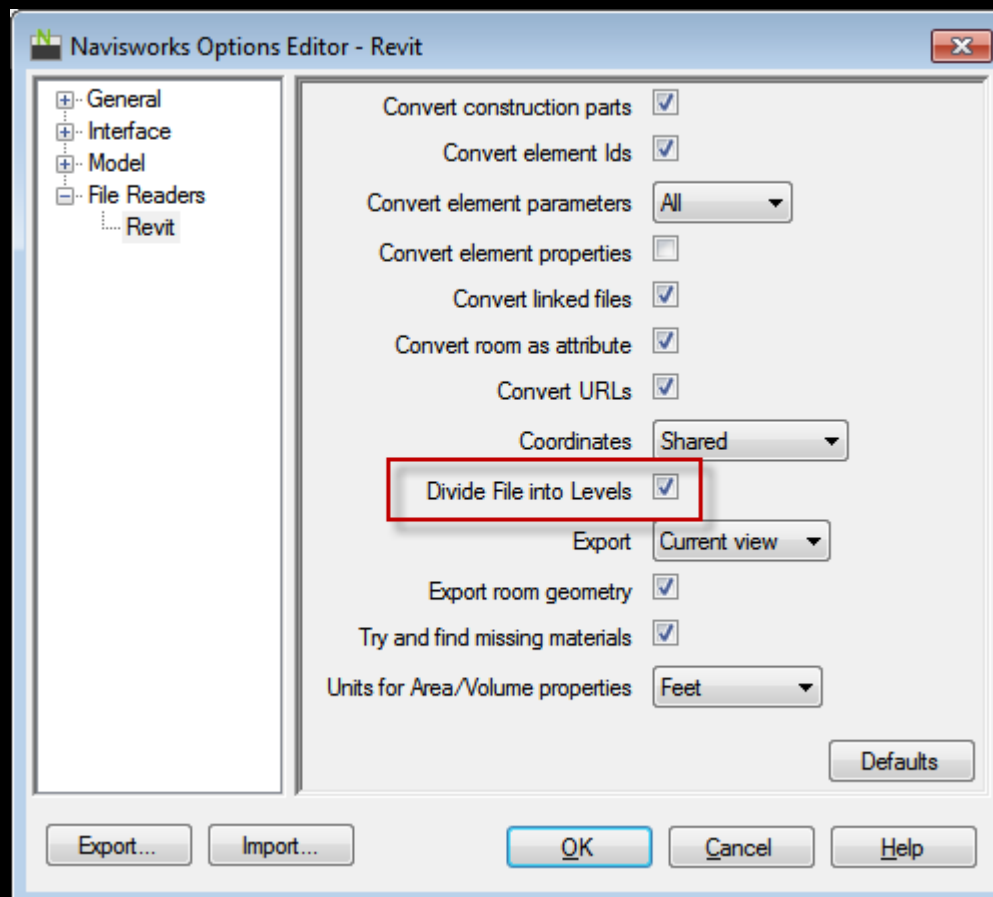

Status	Planned Start	Planned End	Actual Start	Actual End	Task Type	Attached	Material Cost	Labor Cost
	01/04/...	10/02/...	01/04/2009	10/02/2011		Sets->Various	29,691.00	1,245,560.00

# Interoperability

- **.RVT Support**
  - Native support for Revit format
- **Revit Model Representation**
  - Category, family, type organization in selection tree

# Interoperability

- **OGS Improvements**
  - Improved consistent materials performance
  - RapidRT rendering
- **SolidWorks, Catia, NX, JT format support**

# Today's Agenda

- Navisworks Gauss Features
- APIs
  - The Rice (must do)
  - The Wine (value add)

# Navisworks .NET API

- Introduced in 2011
- Continues to expose more through .NET API in 2013

# Navisworks .NET API

- Migration should be straightforward.
- No intended changes to the existing classes and methods.
- Not binary compatible – you will need to rebuild your app with 2013 assemblies.

# Navisworks .NET API

- Enhancements

# Clash Detective API

- For 2013, Clash Detective has an all new .NET API.
- Most future development work will happen here rather than in the COM API.
  - **Api.Clash.ClashTest**
    - Ability to define Tests.
  - **Autodesk.Navisworks.Api.Clash.DocumentClashTests**
    - Ability to run Tests using **TestsRunTest**.
  - **Api.Clash.ClashResult**
    - Analyse and edit Test Results.

Refer to SDK sample: **\api\net\examples\Plugins\ClashDetective**

# Timeliner

- Tasks now have a concept of cost. Data Sources can now import this cost information.
  - **Api.Timeliner.TimelinerTask**
    - Fields have been added to represent common costs.
  - **Api.Timeliner.DocumentTimeliner**
    - Costs can be automatically summed from children using **TasksSummaryRecalculateCosts**.
  - **Api.Timeliner.DocumetTimeliner**
    - Sorting of Tasks using **TasksSort**.

Refer to SDK sample: `\api\net\examples\PlugIns\Timeliner`

# Viewpoints and Camera

- Expose Current Viewpoint, Saved Viewpoints and Camera.
- Current ViewPoint
  - **DocumentCurrentViewpoint**
- Saved ViewPoint Collection
  - **Document.SavedViewpoints**
- Saved ViewPoint
  - **SavedViewpoint**
  - derive from GroupItem
    - common saved view point
    - group of saved viewpoint FolderItem
  - can know the current saved viewpoint
  - **SavedViewpoints.CurrentSavedViewpoint**
- Camera
  - **ViewPoint**
  - Ability to manipulate position, view direction and other Camera properties
  - Provide some methods of Quaternion ( **Rotation3D** )

# Pick methods

- **View.PickItems**

Provide the selecting method with given rectangle or point.

# Grids and Levels Display

- The display of Grids and Levels can be controlled.
  - **Api.DocumentParts.DocumentGrids**
    - Controls which Grid System is displayed.
    - Controls which Grid Lines are displayed.
  - **Autodesk.Navisworks.Api.GridsOptions**
    - Display options for Grid Systems. Including colour, render mode and x-ray mode.

# Comments System

- **Api.DocumentParts.DocumentCurrentComments**
  - Exposure to allow plugin writers to use built in Comments window.
  - Notifications when these comments change.

# Drag Drop

- Ability to drag the Current Selection from the Main Window and the Selection Tree.
- Available in main product.
- allow in developer applications that use Viewer controls.
  - `ViewControl.AllowCurrentSelectionDrag`
  - `ApplicationDragDrop`

# Navisworks COM API

- Continued support in 2013.
- Most new features targeted by .NET API.

# Navisworks COM API

- Migration should be straightforward.
- Intent is that plugins are binary compatible.
- No intended changes to the existing interfaces.
- You will need to use new GUIDs for ActiveX controls and Automation

# Navisworks COM API

- Enhancements

# COM API: Samples ported to C#

- COM Samples have been ported to C#.
  - Modern development environment.
  - Can be used for both 32-bit and 64-bit development.
  - Visual Basic 6.0 samples are no longer supplied.
- On 64-bit OS, we provide a dummy 32-bit 'Integrated' ActiveX control. This is to allow use inside the 32-bit only Visual Studio 2010 designer. (refer to `api\COM\documentation\COM Interface.pdf`)

# Navisworks NwCreate API

- Continues to expose more through NwCreate API in 2013.

# Navisworks NwCreate API

- Migration should be straightforward.
- No intended changes to the existing classes and methods.
- Intent is that API is binary compatible. You should not need to rebuild your app with 2013 libraries.

# Navisworks NwCreate API

- Enhancements

# Grids and Levels

- The NwCreate API now support the creation of Grids and Levels. See the following methods for a starting point:
  - **LiNwcGridSystemCreate**
  - **LiNwcGridLevelCreate**
  - **LiNwcGridLineCreate**
  - **LiNwcSceneAddGridSystem**

# Additional Sample

- New NwCreate API Sample to demonstrate the advanced capabilities of the API.
  - Installed at `.\api\nwcreate\example\multisheetloader`.
  - 2D geometry creation.
  - Multi-sheet file support.
  - Adding GUIDs to uniquely identify geometry nodes.
  - Creating of complex 3D geometry.
  - Grids and Levels.
