This snap is taken from Inventor 2013 content library which show all standards channels.

Here contents of library is very less and we need other standards channels.

We work for it :-

	ption: Inventor	Desktop Conten	t					
Location	of Libraries: <u>C:\Progran</u>	nData\Autodesk\J	Inventor 2013\Conten	Center\Libraries\

					6		as
							17

After copying the above red marked files to location it shows Not Available. So we go for Update it, but it came with error above....

Attaching my contents of blue colour link.....

We really need to solve this issue as soon as possible.

we are not able to use content library, and the parts used from Inventor 2012 are not changing their length dueo to not availability of that standard files in contant library.
