

1. User modifies Inventor drawing file.
2. User saves Inventor drawing file.
3. Vault browser asterisk does not clear after file is saved by user. Checking the file properties in Windows explorer indicates that the file has been saved.

4. User checks in drawing file.
5. User receives dialog box stating that the file requires saving prior to check in.

6. User clicks Yes to save and check in.
7. Drawing saves but the check in dialog box does not display.
8. Asterisk in vault browser does not clear.
9. Repeat Save/Check In without success.
10. User is "blocked" from checking in the file until the vault add in recognizes that the file has been saved.
11. The current work a rounds from Autodesk support are:
  - a. Close the file. Reopen. The file can be checked in.
  - b. With the file still open in Inventor, unload the vault add in. Reload the vault add in. Save the file, the asterisk clears in the vault browser and the file can be checked in.
