## Step 1: Create a new VBA Macro

- 1. Launch VBA Editor
- 2. Goto ApplicationProject
- 3. Activate Module 1 or insert new Module
- 4. Insert the following lines of text into the text window (Shown below) in blue
- 5. Save
- 6. Close

```
Public Sub DisplayLW_OnOff()
Dim oLW As Boolean
oLW = ThisApplication.DrawingOptions.DisplayLineWeights
ThisApplication.DrawingOptions.DisplayLineWeights = Not oLW
Dim oDoc As DrawingDocument
Set oDoc = ThisApplication.ActiveDocument
Dim oViews As Views
Set oViews = oDoc.Views
For Each oView In oViews
oView.Update
Next
End Sub
```

## Step 2: Create a new Ribbon Button

- 1. Right Click on the Ribbon Panel
- 2. Customize User Commands
- 3. Pull down "All Commands dropdown" and Select Macros
- 4. Select DisplayLW\_OnOff and check Text
- 5. Click DisplayLW\_OnOff works like a toggle switch
- 6. If you have multiple views you would need to just adjust the code to change
