Hi Chris,

Something is wrong with the setting in my Vault Professional 2019. The "Material" field is not created automatically in the properties of the Item. It works but only if I manually add property "Material" in the properties of the Item. After a configured the mappings as is in your video I tried...

- 1. I created assembly from 3 parts "Delovi 123.iam" (1 del.ipt, 2 del.ipt and 3 del.ipt)
- 2. Assigned material on the parts and then I checked the assembly with the parts in the Vault
- 3. Assign / Update Item... on the assembly and in the tab Bill of Material I have this window:

V Delovi 123 - Work in Progre	ss - Item								-		×
<u>File Edit View Actions</u>	<u>H</u> elp										
🔄 🔚 Save 🔹 🧷 Exit Edit Mod	e   10 16	200	0 🔗 💽 i M	lechanical Bill	of Mat 💌 🕴 🕂 🛶 🛶 🔤	Compare Delovi 123	► 88	Lat	est	-	R
General History Bill of Mater	ials Where	Used Chang	e Order View								
Latest Work in Progress	- Tod	ay	∼ Pa Mul	ti-Level	✓ → All Rows	~					
Number	Material	Row Order /	Position Number	Quantity	Description (Item,CO)	Title (Item,CO)	Revision		State (Historical)	(	00
🕨 🖃 🔛 Delovi 123		-	-	-		Delovi 123	А		Work in Progress	4	1
E 2 del		0		1 Each		2 del	A		Work in Progress		9
	S355 JR	0		1 Each		1 del	A		Work in Progress		9
🔤 3 del		0		1 Each		3 del	Α		Work in Progress	c l	/ 💡

Material is not populated automatically on the parts. It is filled on the part "1 del.ipt" only because I added manually.

If I want "Material" to be visible to other parts I must do all the time like this:

4. Exit edit mode right click on one of the parts and click Update. Then,

	File Name	Version	Material	Name		/ Value		
🕨 🗋 🖉 🗂	2 del.ipt	1	90MnCrV8	Equivalence Value	Je	2 del		

Then I add the property manually:

V	Add or Remove Property - 2 del	>
Pro	operty list:	
	Property /	Action
	Eff. End	
	Eff. Start	
	Effectivity	
	Equivalence Value	
I	Material	Add 🗸
	Туре	
	OK Cancel	Help

Then I click tab "Bill of Material" and Update the part and finally I have good result:

## If I Assign/Update Item... to the assembly I have this:

Delo	vi 123 - W	Nork in Progress	- Item										$\times$
le <u>E</u> d	it <u>V</u> iew	<u>Actions</u>	elp										
🔒 <u>S</u> ave	e • 🥖	Exit Edit Mode	8 6 2 3	a 🛛 🔗	? Mechanica	al Bill of Mat.	🔻 🕴 🛟 🕶 🛛 👪 Com	npare Delovi 123	<b>▼</b> 88	Late	st	-	R
eneral	History	Bill of Materia	ls Where Used C	hange Order	liew								
atest	Work	k in Progress 🗸	Today	$\sim$	'' Multi-Level	$\sim$	🚱 All Rows 🗸 🗸	]					
		k in Progress 🗸		$\sim$	[174			]					- 4
Num	nber		Today Material	Row Or /	Position Number		All Rows ~ Description (Item,CO)	Title (Item,CO)	Revision		State (Historical)		0
Num	nber 🛛 Delovi	i 123		Row Or /	[174			Title (Item,CO) Delovi 123	Revision A		State (Historical) Work in Progress		1
Num	nber	i 123		Row Or / - 0	[174								1
Num	nber 🛛 Delovi	i 123 del	Material	-	[174	Quantity -		Delovi 123	A		Work in Progress	(	

So, I have to do this steps for each part for all parts and assemblies. I think something is wrong. This should be done only once as a setting and then this should be automatically mapped from ipt to Vault property.

Can you please help me how to resolve it?
