

Kind of part list used: structured (existing) – I need to use this kind of part list because my pos.101 is in a sub-assembly (B) of general assembly, otherwise I couldn't see my component

SUB-ASSEMBLY "B"

Kind of part list used: structured – I put the single line on my table (Ass."B") so the I coul't set my TAG in the chart and the value is automatically reported into balloon.
