The Arch Program© Initialization procedure. Follow these three easy steps.

Step One…
Type in the Drive path location where Arch Program is installed. If the drive path is not correct you will receive an error message.

Step Two…
Type in the Firm name (one word only) If the Firm name is not correct you will receive an error message.
Step Three…
Type in the password. If the password is not correct you will receive an error message. Only when the above values are correct will you be able to proceed.

Initialize Arch Program.
Hit the Initialize Program button or Exit to quit.

The program has been successfully initialized within AutoCAD and is fully operational within this drawing session.
