Extendig the Legends of Light

Hong Kong - China - Philippines - Germany

## LED Manufacturing

Many applications and future projects require LEDs with special wavelengths, body types and outputs. We develop and manufacture LEDs according to your requirements. Through our cooperation with the leading manufacturers of raw wafers, we produce prototype and series LED in short time. ETS LEDs are successfully in use in many innovative products, in addition to special lighting tasks, the LEDs are used in medical applications in the UV and infrared range.

## Electronic Production

We develop and manufacture electronics for all applications, in particular we specialize in LED solutions for medicine, lighting and vehicle construction, in which mostly LEDs from our own development are used.

## Research and Engineering

With our worldwide network of engineers and specialists as well as the engineers here at the locations of ETS Group, which is composed of a wide variety of disciplines, we find the solution and technical implementation for your ideas. Many of our development work is done in close collaboration with universities. Our laboratory is well equipped for a wide variety of tasks and checking the results.

## CNC Metal Working & Glass Parts

With our CNC, plasma and laser technology, we manufacture parts for you from a wide variety of materials. In addition to the 2D cut, we offer professional 3D production too.

## Prototyping & Mass Production

By combining engineering services and manufacturing facilities in one company, we can offer prototyping and transition to mass production from a single source. At our production sites in China and the Philippines, perfectly trained personnel works for you according to European production and social standards. User sourcing, production and quality management under German management ensures the required quality and traceability of the components and materials used.

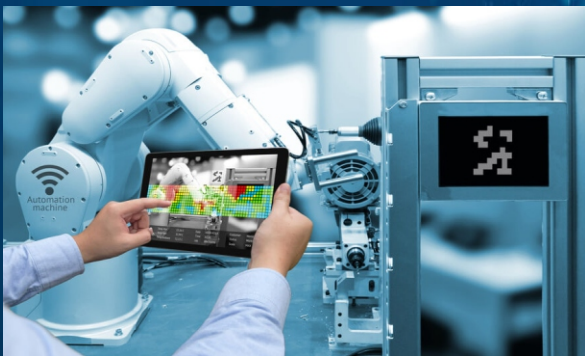

## Assembling

In our production plants, we are happy to assemble assemblies and complete units according to your specifications and with the materials you have supplied as contract manufacturing.

## Plastic Injection Molding & Rubber Parts

With our state-of-the-art toolmaking we develop and manufacture complex tools for plastic and rubber parts. The connected production makes it possible to produce your products in perfect quality from the desired materials in a very short time.

## Customized Robotic

We develop and manufacture professional robotics for our own production lines and for our customer needs too. We are happy to advise you on your projects and find a concept for the implementation.

## About us

The ETS Group was founded by Andreas Wahl in Germany. After the first years of research, development and production of customized LED Products in Germany, Andreas Wahl has moved to China, to provide lower costs to our customers keeping the same high Quality like before.

After the first years of production of the Hui Zhou En Tai Sheng Lighting Co. Ltd. in China the ETS Products Philippines Inc. was founded in the Special Economic Zone Clark as a new additional production location of the ETS Group under German management to expand our range of services.

On 1.793 yd<sup>2</sup> of production area, we develop and produce high-quality assemblies and complete units. Here is also our new logistics center and central warehouse, which also ensures the exports for the products of our Chinese production.

Our positioning in the Special Economic Zone at Clark Airport enables our clients to benefit from EU agreements with ASEAN countries, such as environmental monitoring, social policies, safety regulations, simple customs clearance and straightforward delivery routes.

Our team is made up of highly skilled and dedicated people who have a wealth of experience in both manual and automated PCB and finished product manufacturing.

We are a customer focused organisation with a very strong commitment to quality and service and have built up an excellent reputation within the industry. You will find us competitive, responsive and very easy to do business with. Many of our customers are longstanding and will testify to our commitment, flexibility and ongoing support.

ETS can look back on more than 30 years of successful cooperation with customers from all over the world and we hope to win you as a customer too.
