

Define Study

Tokyo High-Use District Simulation ? :

Author : None provided

Study Name

Method

Inputs

a Maximum square footage(m²)
Constant: 300 ————— 15000

a Minimum square footage(m²)
Constant: 300 ————— 6000

a Square footage CaseNo.(0-4)
Variable: 0 to 4

b How to get a square CaseNo.(0-4)
Variable: 1 to 30

c Setback distance from site boundary(m)
Variable: 2 to 5

d Low-rise shape: Standard floor shape /2-segment shape
Variable: 0 to 1

i Standard floor area ratio (%)
Constant: 500 ————— 900

j Limit set for mitigated floor-area ratio (%)
Constant: 350 ————— 400

k Capacity for breeding use (%)
Constant: 100 ————— 200

l Area covered by basement volume (m2)
Constant: 1000 ————— 10000

m Standard building-to-land ratio (m²)
Constant: 100 ————— 100

n Maximum height limit (m)
Constant: 90 ————— 240

o Low floor patio height (m)
Constant: 3 ————— 4.5

p High floor patio height (m)
Constant: 2.8 ————— 3.5

q Tower house step height (m)
Constant: 10 ————— 15

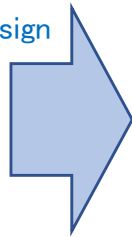

r Office Depth Target (m)
Constant: 18 ————— 25
