Simulation Compute Manager installer update 1.4.77:

Where can I download the SCM updates?
Simulation Compute Manager 1.1 Update 1.4.77, is available from two places:
1. From the 'My Updates' section from the Autodesk Desktop App (make sure you are logged in. If you believe you should see updates it and you do NOT, please log out and log back in).

NOTE the desktop app does not support Linux. For Linux follow step 2 below.
2. From Autodesk accounts in the 'Product Update' section ([video](#))

or in the 'Updates & Add-ons' section ([video](#))

How to update SCM on Windows?
1. Close/stop all Moldflow applications you may have running, including the solvers.
2. Download the installer and start the .msi installer and step through the installer. Accept the terms and conditions to continue the installation process. Specify the location for your installer and start the installation. The existing SCM version will be updated to the latest.

How to update SCM on Linux?
Follow the instructions in the online help [here](#) which contains instructions on how to update the shin client and RPM installations.
