

Moldflow Insight 2021.1.1:

On windows the Moldflow Insight 2021.1.1 installer will update Moldflow 2021.1 to 2021.1.1. For Linux this is a full installer, intended to replace the 2021.1 Linux installation.

NOTE that this update cannot be applied to Moldflow Insight 2021.0.

Where can I download the Moldflow Insight 2021.1.1 update?

The Moldflow Insight 2021.1.1 installer is available from two places:

1. From the 'My Updates' section from the Autodesk Desktop App (make sure you are logged in. If you believe you should see updates it and you do NOT, please log out and log back in).

***NOTE* the desktop app does not support Linux. For Linux builds follow step 2 below.**

2. From Autodesk accounts in the 'Product Update' section ([video](#)), or in the 'Updates & Add-ons' section ([video](#))

How to update Moldflow Insight 2021.1 on Windows?

1. Close/stop all Moldflow applications you may have running, including the solvers.
2. Download the installer and start the .msi installer and step through the installer. Accept the terms and conditions to continue the installation process. Specify the location for your installer and start the installation. Moldflow Insight 2021.1 will now be updated to the latest.

How to update Moldflow Insight 2021.1 on Linux?

The Linux update is a full installation and not a 'patch' installer. There fore if you will have to uninstall the Moldflow Insight 2021.1 first (Thin Client uninstall instructions [here](#), Workstation uninstall instructions [here](#)).

Then install the Moldflow Insight 2021.1.1 product again (Thin client installation instructions [here](#), workstation installation instructions [here](#)).
