1. Architect (BA) is solely responsible for design interpretation of the construction documents.

2. The general contractor shall be responsible for the scheduling of all activities in such a manner that the construction remains on or ahead of schedule.

3. The contractor shall not be responsible for any damage to existing structures, walls, etc., not caused by the contractor.

4. The contractor shall not be responsible for the installation of any temporary or permanent shoring or bracing required as a result of excavation, etc.

5. All excavation, grubbing, and stump grinding shall be done to the specifications of the architect.

6. The general contractor shall coordinate the installation and location of all fixtures and equipment, and the installation and maintenance of the equipment. The equipment shall be coordinated with mechanical, electrical, plumbing, and up-to-date systems.

7. The contractor shall provide subcontractors with all necessary drawings showing all potential building locations so that all subcontractors and their employees are aware of the work to be done.

8. The contractor shall coordinate all lights, electrical, and telecommunications work during construction to ensure that all lighting, electrical, and telecommunications systems are coordinated in accordance with the construction documents.

9. The general contractor shall coordinate the installation of all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

10. The electrical, telephone, and data communication plans shall be used to determine the location, quantity, extent, and type of light fixtures.

11. The reflected ceiling plan/ lighting/electrical plan is conceptual and shall be used to determine the location, quantity, extent, and type of light fixtures.

12. The general contractor shall coordinate the installation and maintenance of all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

13. All work shall be square, level, true, plumb, etc., unless noted otherwise. The general contractor shall be responsible for any temporary shoring or bracing required as a result of excavation, etc.

14. The general contractor shall be responsible for any temporary or permanent shoring or bracing required as a result of excavation, etc.

15. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

16. The general contractor shall provide temporary power to all subcontractors and their employees. The temporary power shall be provided on a time and materials basis.

17. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

18. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

19. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

20. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

21. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

22. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

23. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

24. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.

25. The general contractor shall coordinate all temporary and permanent electrical, telecommunications, and mechanical systems. The equipment shall be coordinated with the architect.
