## Primary Issues Resolved by 2018.2 Update

### Compatibility issues on macOS Mojave

- Installation failure.
- Cannot edit text input field on visor.
- Some labels on the UI shows dark in dark theme.
- Plot style editor and AutoCAD asks for permission to access Calendar and Contacts.
- AutoCAD asks for permission to accessibility features when using Materials.
- Crash when close the Appload dialog.
- Alert about DockIconInstaller shows in the first launch of AutoCAD.
- Palette title missing in the auto-hide mode.

### Others

- The standalone AutoCAD Plot Style Editor app cannot be launched.
- Sometimes AutoCAD crashes when the Mac machine wakes up.
- The styles dialog and Mtext Editor visor does not show the original font when it is not found.

## Thank You

We want to express our appreciation to all our customers who identified these issues and reported them to us. Their reports gave us the opportunity to improve the product and to provide you with the best solution in general design and drafting. We also thank you for your continued business, and for your feedback regarding this release.

Respectfully,

Autodesk AutoCAD and AutoCAD LT Product Team
