2024.1 Update

 SHARE

Sep 26, 2023

The 2024.1 Update fixes compatibility issues with macOS 14 Sonoma and improves user experience and overall stability of the product. It also improves security in some areas.

The 2024.0.1 hotfix is included in this 2024.1 Update.

Fixed Issues

Autodesk Trust Center

For the latest information regarding the security fixes in this update, refer to the [Security Advisory](#).

macOS Sonoma Compatibility

Saving and replacing existing drawings in a sheet set no longer cause a crash in macOS Sonoma.

Grip-editing now works smoothly in macOS Sonoma.

"AutoFill" no longer displays on the shortcut menu in macOS Sonoma.

Stability

Occasional crashes when starting the AutoCAD for Mac.

Occasional crashes when switching layout.

Occasional crashes when saving transmittal packages (eTransmit).

UI

The flyout menu in the Tool Sets palette now displays the complete labels in some localized versions.

Customization

AutoCAD menus no longer disappear in the menu bar after customization in some cases.
